

15 cm Stufen-Steigung
 Schrittmaß $2 \times S + A = 63 \text{ cm}$

TimberCast SL-Logstep 1000

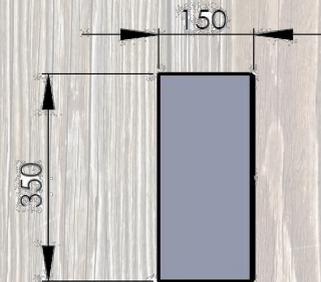

Elegant block step with a brushed and non-slip surface on the step surface, made of Siberian larch.

The block step is equipped with a smooth base on which a 5 mm thick brushed natural wood surface is applied.

Elegant $1 \times 45^\circ$ chamfers on the corners and short sides of the top surface.

To protect the long edges of the top surface, there are $3 \times 45^\circ$ chamfers.

There is a 4 mm wide and 5 mm deep dummy joint integrated between the 2 "faces" of the top.
